3. Possible hazards

HEALTH EFFECTS

ACUTE:	EYES:	Irritating. Possible hazard from freezing due to rapid evaporation of propellant.
	SKIN:	Excessive prolonged contact may cause frostbite and skin irritation and may eventually lead to dermatitis.
	INHALED:	Intentional misuse by deliberately concentrating and inhaling product can be harmful or fatal. May cause irritation of the respiratory tract.
	SWALLOWED:	Unlikely to be a problem under normal conditions of use. If a significant amount of liquid product is swallowed may produce abdominal pain and nausea. Aspiration into lungs can produce severe lung damage and is a medical emergency.
CHRONIC:		Not determined.

4. First Aid Measures

Skin contact: Remove contaminated clothing and wash affected area with soapy water.

Eye contact: Hold open and flush with plenty of water for at least 15 minutes.

Ingestion: Do not induce vomiting. Give water and seek medical advice immediately.

Inhalation: Remove affected person from contaminated area and urgently seek medical advice. If not breathing apply artificial respiration.

5. Fire-fighting measures

Suitable extinguishing material: Dry chemical foam or carbon dioxide. Water may be ineffective.

Hazardous Products of Combustion: Carbon dioxide, possibly carbon monoxide. Smoke may also be produced.

6. Accidental Release measures

- For disposal of large quantities, contact local waste disposal authority.
- For spills, when cans are punctured, remove all ignition sources. Collect with absorbent material. Allow to evaporate if possible. If incident is significant, contact local fire authorities and police.
